Subject: CN Hornepayne Yard

CN.

Kirk, the following is an update on the 4 action items for the Hornepayne Yard:

1. Operations Manual – this has been completed, and a copy of the manual has been provided to the MOE.
2. ECA Amendment – Lagoons 1, 3 and Central Unlined Lagoon. We received zoning information from the Township of Hornepayne on Friday of last week. CN signatures are now required so this will take a bit of time. The application should be submitted later this week or early next week. It is my understanding that a copy will also be provided to you.
3. Soil Containment Cell – We have provided CN with a report regarding various options for the Soil containment Cell, including but not limited to applying for an ECA or total removal of the cell and off-site disposal of impacted soil. This was issued to CN last week, so they will require some time to go over the options.
4. EASR for the Bunkhouse Generator – We are at a standstill with this online application. Two separate CRA numbers for CN have been used, both of which were denied by the online application. CN will be contacting Canada Revenue to verify that the numbers are correct. If they are, then we will need some direction from the MOE as to the path forward, as the program will not allow us to proceed.

s.21  If you need any further information please contact Nick Tropea.

Regards,

Tony Gallo M.Sc. EP
